

CLAIMED HORSES

All claimed horses will be tested after the race; blood and urine will be obtained. The new owner/trainer may observe but must not have contact with the horse until after the test samples are obtained. The new owner can measure hobbles if they choose.

Once testing is complete, the horse will be turned over to the new owner/trainer. The new owner/trainer must have someone present to pick up the horse as soon as the test is completed. Failure to have someone present to pick up the horse may cause the new trainer to be cited by the Judges.
